The image displays a 10x10 grid of 100 Braille characters. Each character is a unique combination of dots 1 through 6, arranged in a 2x3 grid. The characters are organized into four groups of 25, with each group containing a 5x5 sub-grid of characters. The groups are separated by empty rows and columns, creating a clear visual structure for the entire set of 100 characters.

Figure 1: A diagram illustrating the structure of the  $2 \times 2$  grid of  $2 \times 2$  subgrids. The grid is composed of four  $2 \times 2$  subgrids, each containing four points. The points are arranged in a  $4 \times 4$  grid, with the top-left subgrid containing points at (1,1), (1,2), (2,1), and (2,2), and the other subgrids containing points at (3,1), (3,2), (4,1), and (4,2).
